Description			
Impossible to create a new country via the admin interface			
==> Unknown field "user.username"			

History

#1 - 03/29/2016 12:08 pm - Paul Carensac

- Assignee set to Paul Carensac

- % Done changed from 0 to 100

We can't call a foreign_key's attribute from admin's Inline 'field' attribute.

We had to declare a new method in the Country model that returns the wanted attribute, and to call it from Inline's field attribute.

#2 - 03/29/2016 12:10 pm - Paul Carensac

- Status changed from Nouveau to Résolu

#3 - 03/29/2016 12:11 pm - Paul Carensac

- Status changed from Résolu to Fermé

#4 - 03/29/2016 03:43 pm - Etienne Pallier

- Target version set to Version 0.01 - Multi-platform skeleton easy install
